About This Report

This report documents a thorough analysis of the Internet domain name "**SfEros.com**". It draws on the extensive DomainTools dataset and aims to deliver a comprehensive view of the domain's ownership profile, key historical events and technically linked domain names.

All data in this Report is, or was, freely available through standard Internet DNS and query protocols. DomainTools has not altered the data in any way from its original form, except in certain instances to format it for readability in this Report.

Data from DomainTools is presented as-is, and as captured from the original source. We make no representations or warranties of fitness of any kind.

About DomainTools

For over 20 years, DomainTools has been the most popular domain research service on the internet because we have the most comprehensive coverage of generic and country code Top Level Domains. We have also collected and stored Whois and related hosting/DNS data to provide the most complete historical records in the industry.

DomainTools helps our users turn threat data into threat intelligence. We can help you connect indicators from your network, including domains and IPs, with others among the nearly 380 million active domains we track, leveraging over 13 billion DNS-related data points to build a map of "who's doing what" on the Internet. Fortune 100 companies, global government agencies, and leading security solution vendors use DomainTools as a critical ingredient in their threat investigation and mitigation work.

Reach us at memberservices@domaintools.com if you have any questions about this report.

Screenshot History

DomainTools captures snapshots of website homepages on regular intervals. This content is useful for researchers to understand how a domain was used at various points in time. Due to the relatively high storage costs of screenshot data, the coverage of screenshot histories is in most cases not as thorough as Whois or hosting data, and this is especially true for dates early in a domain's history.

DomainTools has 11 records collected between Jun 20, 2004 and Oct 8, 2016.

Connected Domains

Shared IP Address

DomainTools uses proprietary techniques to discover other domain names that are hosted on the same IP address (web host) as SfEros.com. This is a sample of up to 100 randomly-selected domains from that dataset. Access to this data provides context in cases where knowing associated domain names has value.

The exhaustive list of connected domains by IP address is available in the Reverse IP product at DomainTools.com.
